

Type 1

Stack Dimensions Using Lever Closure Panel

The stack depth and width dimensions are based on a flat stack and standard construction with vinyl faces. Optional construction and/or face covering may increase stack depth dimensions. Angled stacks require additional space. Contact your local distributor for angled stack requirements and pivot panel stack information.

1. Stack Depth:

Model 631

3-3/4" [95] per panel plus 1" [25]

Model 641

4-1/4" [108] per panel plus 1" [25]

Carpet Faces

4-1/2" [114] per panel plus 1" [25]

2. Stack Width:

(a) Retractable & Sweep Seal Models;

Panel width + 12" [300] clearance

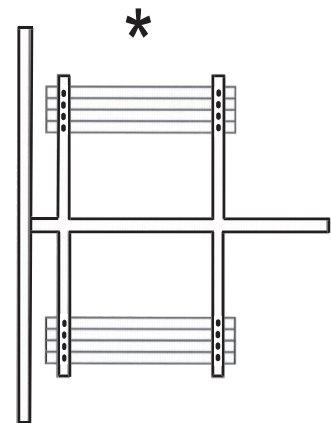

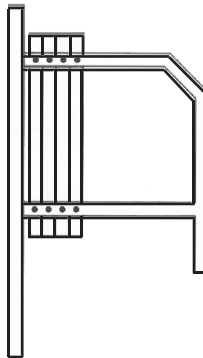

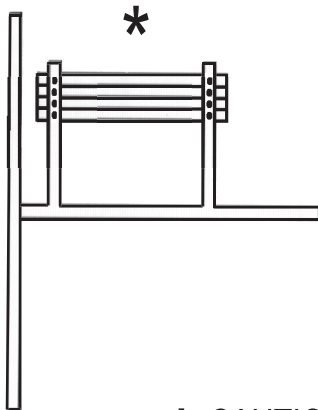

(b) Automatic Bottom Seals;

Panel width + 14" [356] clearance

3. Pocket Storage:

Due to the wide variety of configuration possibilities, contact your local distributor for space requirement.

The Type 1 stack shown above is the most often used for simple omni-directional layouts. The following are additional common stack configurations. Stacks are not limited to these configuration and may be built to fit each requirement.

*** CAUTION**

Body space is needed to access the panels and move them into position. This is important for all configurations, but can be especially important for those stacks marked with an asterisk.
